EXPERIENCE

Software Engineer

May 2025 – Apr. 2026

Boothwyn Pharmacy

Remote

- Identified workflow inefficiencies and built internal web apps using C#, .NET, and Blazor
- Designed SQL Server queries to improve reliability of patient and order processing
- Led development of order, labeling, and dashboard features to reduce manual work

Software Engineer

Jun. 2024 – May 2025

Conquest

Torrington, CT

- Took ownership of new client projects, building web apps in C#, .NET, and Blazor from requirements to deployment
- Proactively developed an oven web app to streamline viewing and managing Excel-based operational data
- Built and delivered the CT Music Festival registration platform, improving user onboarding and event management

Software Engineer

Aug. 2023 – May 2024

NB Cares

Remote

- Enhanced a React dashboard by improving real-time data flow between web and mobile systems
- Built REST APIs to resolve data synchronization issues and improve system reliability
- Improved UI responsiveness and frontend performance for better user experience

Software Engineer Intern

Jun. 2023 – Aug. 2023

Infosys

Hartford, CT

- Built AI tools in Python using Hugging Face to analyze and summarize code behavior
- Evaluated machine learning models for accuracy, cost, and performance

Software Engineer Intern

Jan. 2022 – May 2023

Jobs for Humanity

Remote

- Led development of a job matching system using Python and MySQL to improve candidate-job alignment
- Applied NLP techniques to clean and structure resume data, increasing matching accuracy
- Refactored data processing logic to reduce latency and improve system performance

IT / Software Engineer Intern

May 2022 – Aug. 2022

APS Technology

Wallingford, CT

- Diagnosed and resolved system issues to improve reliability across multiple environments
- Supported network setup and proactively troubleshoot connectivity problems
- Built a C++ program to copy files across devices using file I/O

PROJECTS

Cyber Tutor

Java, Python, React, TypeScript, Firebase, AWS

- Built a cybersecurity learning platform with adaptive quizzes and personalized learning paths
- Developed backend APIs for real-time data processing
- Used cloud services for authentication and deployment

TECHNICAL SKILLS

Languages: C#, Java, Python, SQL, TypeScript, JavaScript, C++

Frameworks: .NET, Blazor, Razor Pages, React, REST APIs, Firebase

Tools: Git, Docker, Azure DevOps, AWS, VS Code, Visual Studio

Systems: Linux, Distributed Systems, Debugging

EDUCATION

Central Connecticut State University

New Britain, CT

Master of Science in Software Engineering

Jan. 2024 – May 2025
